Credit Name:CSE 2110 Procedural Programming 1

Assignment Name:House and MetricConversion

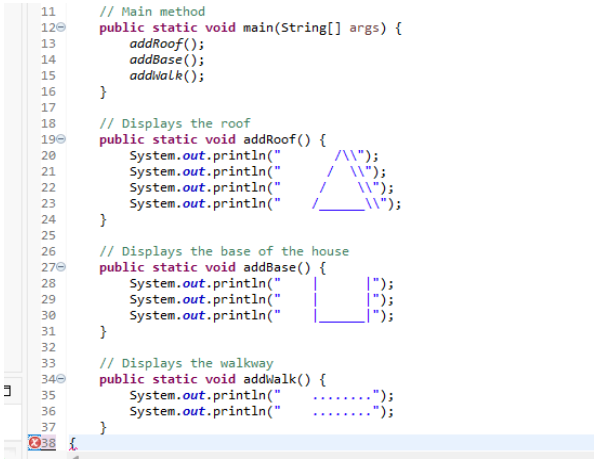

Error Log Entry

What error message did you encounter (if any)?
I got an error because I forgot a quotation mark or a semicolon in my code.

What unexpected behavior did your program exhibit?
My program would not run because there was a syntax error in the code.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)
The issue was a syntax error because I missed a quotation mark in a System.out.println() statement.

Include a screenshot of specific lines of code.

```
11      // Main method
12      public static void main(String[] args) {
13          addRoof();
14          addBase();
15          addWalk();
16      }
17
18      // Displays the roof
19      public static void addRoof() {
20          System.out.println("       /\\");
21          System.out.println("      /  \\");
22          System.out.println("     /    \\");
23          System.out.println("    /______\\");
24      }
25
26      // Displays the base of the house
27      public static void addBase() {
28          System.out.println("    |      |");
29          System.out.println("    |      |");
30          System.out.println("    |______|");
31      }
32
33      // Displays the walkway
34      public static void addWalk() {
35          System.out.println("    ........");
36          System.out.println("    ........");
37      }
38  }
```

How did you fix the issue?

I checked my code carefully and added the missing symbol. Then I ran the program again.

Provide the corrected code or solution using a screenshot.

```
10
11      // Main method
12      public static void main(String[] args) {
13          addRoof();
14          addBase();
15          addWalk();
16      }
17
18      // Displays the roof
19      public static void addRoof() {
20          System.out.println("       /\\");
21          System.out.println("      /  \\");
22          System.out.println("     /    \\");
23          System.out.println("    /______\\");
24      }
25
26      // Displays the base of the house
27      public static void addBase() {
28          System.out.println("    |      |");
29          System.out.println("    |      |");
30          System.out.println("    |______|");
31      }
32
33      // Displays the walkway
34      public static void addWalk() {
35          System.out.println("    ........");
36          System.out.println("    ........");
37      }
```

```
38 }
```
