

Credit Name:Programming

Assignment Name:Eggs and Grade

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge? I read the questions and broke them into smaller steps.

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion? Yes. I was confused about the egg prices. I looked at the examples to understand them.

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? Yes. I made an IPO chart before coding.

How did you decide on the tools, data structures, or algorithms to use? I used variables, if statements, and basic math.

Implementation

Did you write the code in small pieces or attempt the entire solution at once? I wrote the code in small pieces.

How did you test your solution along the way to make sure it was working? I used different numbers to check if the answers were correct.

Overcoming Challenges

What part of the problem was the most difficult for you? The hardest part was calculating the egg cost.

How did you handle moments when you felt stuck or unsure of what to do next? I checked my notes, examples, and tested my code.

Learning

Was there anything you learned that you think will help you with future challenges?

Yes. I learned how to use if/else statements and how to test my code.
