Credit Name:CSE 2110 Procedural Programming 1
Assignment Name:PrimeNumber and Investment

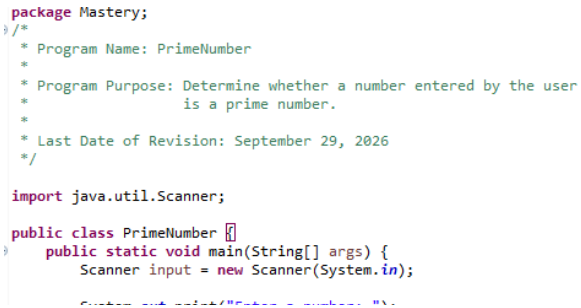

Error Log Entry

What error message did you encounter (if any)?
I received a syntax error because I accidentally missed a closing bracket in my code.
What unexpected behavior did your program exhibit?
The program would not run because Java could not correctly read the code.
What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)
The issue was a syntax error caused by a missing } bracket.
Include a screenshot of specific lines of code.

How did you fix the issue?
I checked the brackets in my code and added the missing } so that all of the statements and loops were properly closed.

Provide the corrected code or solution using a screenshot.

```
package Mastery;
/*
 * Program Name: PrimeNumber
 *
 * Program Purpose: Determine whether a number entered by the user
 *                  is a prime number.
 *
 * Last Date of Revision: September 29, 2026
 */

import java.util.Scanner;

public class PrimeNumber {
    public static void main(String[] args) {
        Scanner input = new Scanner(System.in);
```

```
        System.out.print("Enter a number: ");
        int number = input.nextInt();

        boolean prime = true;

        if (number <= 1) {
            prime = false;
        } else {
            for (int i = 2; i < number; i++) {
                if (number % i == 0) {
                    prime = false;
                    break;
                }
            }
        }

        if (prime) {
            System.out.println(number + " is prime.");
        } else {
            System.out.println(number + " is not prime.");
        }

        input.close();
    }
}
```
