

Credit Name:Programming

Assignment Name:Digits and TimeConversion

Error Log Entry

What error message did you encounter (if any)? I did not get an error message.

What unexpected behavior did your program exhibit? Both programs worked correctly after testing them.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) I did not have a major issue. I just had to make sure the math was correct for both programs.

Include a screenshot of specific lines of code. Add screenshots of the lines that calculate the digits and the time.

How did you fix the issue? I checked my calculations and tested both programs with different numbers.

Provide the corrected code or solution using a screenshot.

```
24 // Display the result
25 System.out.println("The time is " + hours +
26 {{
27 input.close();
28
29 Syntax error, insert "}" to complete MethodBody
```
